

# COCOON

Visit our homepage for more information - <http://www.plasmic.dk/cocoon>

## Welcome

**Stressful PC noise, PC vandalism, hardware theft, unattractive PCs and unhindered access to private information no longer has to be a problem.**

**COCOON is revolutionary PC furniture, designed to bring unmatched noise reduction, physical protection of the PC, and unique aesthetics to the modern office environment.**

**Aesthetic PC Furniture**  
The unique solution

**An Ergonomic Vision**  
3 years experience

### Improving the Office Environment

The ultimate in quality, styling and skilful craftsmanship is yours in COCOON. Silent elegance, environmental safety and the best available technologies ensure an effective gratifying product.

### Unique Noise Reduction

Acoustic noise adversely affects human well-being. COCOON reduces stress, increases productivity, extends the creative enjoyment, and saves the expense of a separate server room.

### Security and Privacy

Your PC is a vital business asset and the most effective way to protect it, is to enclose it. For effective security, COCOON features a powerful built-in locking system with reinforced steel bars, milled-in steel hinges and 25mm MDF wood.

### Relief for Everyone

COCOON has already proven suitable for a number of environments: retail, (home) offices, receptions, information stands, the living room, schools, libraries, Internet cafes, hotels, law firms, banks, recording studios and industrial environments.

COCOON is developed in Denmark – a country known for its prestigious furniture design tradition

## Summary of features:

- Market's most effective noise reduction
- Maximum security through embedded system locks
- Modular built-in cooling – NO external fans
- Two doors offer easy access to the PC
- Wheels provide PC mobility and ease cleaning
- Exchangeable dust filter protects electronics
- Timeless elegance – 5 different veneer types
- Less stress extends your creative enjoyment

The objective of COCOON is to generally improve the office atmosphere, hide the often unattractive PCs and provide enhanced security for an important everyday resource.
